

## Hearing Aid Compatible Indigo Wireless Phones

If you use hearing aids, be sure to try different hearing aid-compatible phones at an Indigo Wireless store to find the best one for you. These devices have been tested and rated using established FCC guidelines for Hear Aid Compatibility (HAC). The HAC ratings, or M-ratings and T-ratings, help you find the phone that's right for you.

### Hearing Aid Compatibility Levels of Functionality

Indigo Wireless offers a variety of HAC phone models to meet the needs of wireless users with hearing disabilities. The mobile units are presented here by category as follows:

**Advanced** handsets incorporate new technologies and advanced data speeds, voice, web browsing and e-mail capability, as well as increased storage, high-resolution display, enhanced camera and video capability, and social media and download functionality. Feature phones can operate on 3G and 4G networks;

**Average** handsets offer upgraded voice, web browsing, e-mail, camera and video capability, social media and download functionality at an intermediate price; and,

**Basic** handsets provide lower cost voice service with basic texting, web browsing and e-mail capability.

Manufacturer	Model	Wi-Fi	FCC ID	Rating	Level of Classification
Alcatel	One Touch Idol X	Yes	RAD493	M4, T3	Advanced
CAT	S50	Yes	ZL5S50	M4, T4	Advanced
Motorola	One Zoom	Yes	IHDT56YC1	M4, T4	Advanced
Motorola	G30	Yes	IHDT56ZN1	M3, T3	Advanced
Motorola	Moto G 2 <sup>nd</sup> Generation	Yes	IHDT56QB1	M3, T4	Advanced
Samsung	Rugby 2	No	A3LSGHA847	M3, T4	Average
Samsung	Galaxy A71	Yes	A3LMA716U	M4, T3	Advanced
Samsung	A10E	Yes	A3LSMA102U	M3, T3	Average
Snapfon	EZ4G	Yes	2AW56-EZ4G	M3, T3	Average
Snapfon	ezTwo	No	ZXL-EZTWOB1	M3, T3	Basic

### Interference and Telecoils

#### **M-ratings and hearing aid interference**

Phones with an M-rating of M3 or M4 meet FCC requirements. They're less likely to create hearing aid interference than phones that don't have this rating. M4 is the better rating. Hearing devices may also be measured to find out if they're interference-proof. Your hearing device manufacturer or hearing health professional can help you find the results for your hearing device. The more interference-proof your hearing aid is, the less likely you are to have interference noise from wireless phones.

#### **T-ratings and compatibility with telecoils in hearing aids**

A telecoil is a small device built into some hearing aids to use with phones and assistive listening devices. Not all hearing aids have telecoils. Phones with a T-rating of T3 or T4 meet FCC requirements and are more likely to work well for people who use hearing aids with telecoils. T4 is the better rating.
