

## Hearing Aid Compatibility (HAC)

The Federal Communications Commission (FCC) has adopted hearing-aid compatibility requirements for all digital wireless phones. We strive to exceed these requirements. If you are looking for a hearing aid compatible device and would like help in making a choice, please give us a call toll free: (877) 662-3600.

### Our current selection of HAC rated devices include:

MAKE	MODEL	M-RATING	T-RATING
ALCATEL	One Touch Idol X	M4	T3
ALCATEL	One Touch	M3	T4
CAT	S50	M4	T4
MOTOROLA	RAZR V3	M3	T3
MOTOROLA	MOTO G 2 <sup>nd</sup> Gen.	M3	T3
MOTOROLA	MOTO X	M3	T3
NOKIA	E5-00	M3	T4
SAMSUNG	RUGBY 2	M3	T4
SAMSUNG	Galaxy A5	M4	NA
SAMSUNG	Galaxy J2	M3	NA
SNAPFON	EZ2	M3	T3
VERY KOOL	S810	M3	T3
CAT	B15	M3	T3
SAMSUNG	GALAXY S8	M4	T3
SAMSUNG	GALAXY S7 EDGE	M4	T3
HTC	ONE M9	M3	T4
ZTE	223	M3	T3

### WHAT THE RATINGS MEAN

An “M” rating measures compatibility with acoustic hearing aids while the “T” rating measures compatibility with induction hearing aids. Ratings are not guarantees. Results will vary depending on the user’s hearing devise and hearing loss.

**M-Ratings:** The M stands for the microphone rating. Handsets that receive a hearing aid compatibility rating of M3 or M4 have met or surpassed the ANSI hearing aid compatibility standard as adopted by the Federal Communications Commission. M3-rating indicates the handset has satisfied the ANSI standard. M4-rating indicates the handset has exceeded the ANSI standard. Phones rated M3 or M4 are likely to generate less interference to hearing devices than phones that are not labeled.

**T-Ratings:** The T stands for telecoil rating. Handsets that receive a telecoil rating of a T3 or T4 have met or surpassed the required standard as adopted by the FCC. T3-rating indicates that the handset has satisfied the ANSI standard. The T4-rating indicates the handset has exceeded the ANSI standard.
